On behalf of the Organizing and the Program Committees of the 2019 International Workshop on Complex-systems for Future Technologies and Applications (IWCFTA), it gives us a great pleasure to invite you to participate and deliver a plenary speech in the IWCFTA, which will be held during **October 11 to 13, 2019**, in Southeast University, Nanjing, China.

The 2019 IWCFTA will be the successor of the formerly successfully eleven sessions of the "International Workshop on Chaos-Fractals Theories and Applications". In this year, the name changes to "International Workshop on Complex-systems for Future Technologies and Applications" with the same abbreviation IWCFTA (Home Website: <http://chaos-fractal.cn>). This series of conferences has been held annually since 2008, and now it has become a premier international workshop in the areas of complex systems and artificial intelligence. The conference focuses on the most relevant theories, methodologies and approaches to understanding, modelling, simulating, predicting, evaluating and mastering various Societal, Ecological, Biological and Engineered Complex Systems with their real-world applications.

The 2019 workshop is sponsored by the Jiangsu Key Laboratory of Networked Collective Intelligence and School of Mathematics at the Southeast University, China, and the Centre for Chaos and Complex Networks at the City University of Hong Kong, China.
